

# Reversible Bottom Blade

## Performance of the Reversible Bottom Blade

Name & position: *Carel Buitendach (Head Greenkeeper)*

Golf Course: *Lost City Golf Course*

**1. Quality of The Reversible Bottom Blade vs OEM?**

- *The quality of the blade is exceptional & will last longer than your normal OEM.*
- *The quality of cut is fantastic & you do not have to back-lap after applying new reversible blades on your ride-on or walk behind.*

**2. Straightness of The Reversible Bottom Blade vs OEM?**

- *The blades are made of the highest quality metal and it keeps its straightness for a very long time. In fact, I have never had any issues with any skew blades after plenty hours of cutting.*

**3. Is back lapping required to set The Reversible Bottom Blade onto the Cylinders?**

- *Well!! As I've said in point one, the new bottom blades doesn't have to be back-lapped when setted on the machines. As a head Green Keeper its weird to wrap this around your head to actually not back lap at all when setting new blades on a machine before starting to cut*

**4. Cutting quality of The Reversible Bottom Blade vs OEM?**

- *My opinion, a much finer quality cut than your normal standard low / tournament bottom blades.*

**5. Durability of the Reversible Bottom Blade, Estimate hours of cutting?**

- *We get about 190 to 200 Hours out of the blades.*
- *If there are a bit of sand on the greens after dusting cultural practices, you life span on the blades a little less.*

**6. Once turning has the side that hasn't been used shown any signs of wear or rust?**

- *Not at all*

**7. Does the second row of holes cause any problems?**

- *No issues at all*

8. Can you say if the Reversible Bottom Blade is better or equal to OEM blades?

- *I would say better*

9. Would you recommend the Reversible Bottom Blade to other golf courses?

- *Definitely*

10. What sort of saving impact has the Reversible Bottom Blade had on your budget?

- *A massive saving! You will have a chance to spend more on other R&M necessities.*

11. How does the Reversible Bottom Blade compare to Aftermarket blades?

- *Better Quality & Longevity*

Kind Regards

**Carel Buitendach**
